

Submitting the final carbon footprint form

The completed footprint must be checked and approved by the production company's nominated albert reviewer for accuracy. It will then be automatically directed to an external auditor for a standard assurance review. Once audited and approved, the nominated albert reviewer will receive an automated email from support@greenstoneplus.com, with 'Final carbon footprint has been approved' in the subject line.

It is then the production company's responsibility to forward this email to their S4C PAC/ delivery contact (albert@s4c.cymru) within two weeks of the programme's transmission. This forms part of a production's final stage of paperwork delivery.

Please note submission of a final carbon footprint does not automatically entitle a programme to use the albert 'badge' onscreen. For information on how to qualify for the badge, see the albert certification section.
